

تعليقة شدة — Master App Prompt (Final Version)

OVERVIEW

Build a mobile-first Arabic card game **session tracker** called "تعليقة شدة". This is NOT an online card game. Friends sit together physically, play cards, and use this app to:

- Track scores in real-time (no paper, no cheating)
- Build history and stats with their crew over months
- Compete for bragging rights with Jordanian humor baked in

Target users: Groups of 2–6 friends in cafés and homes in Jordan and the Levant. **Core problem:** Paper score tracking = cheating, disputes, forgotten history. **Platform:** Mobile ONLY. iOS + Android. Base width: 390px. No desktop layout, ever. **Language:** Arabic throughout. Levantine dialect (Jordanian). RTL layout on every screen. **Theme:** Dark only. No light mode in MVP.

TECH STACK

Layer	Choice
Frontend	React Native (Expo)
Backend	Supabase (Postgres + Realtime + Storage)
Auth	Phone OTP (no email, no social — Jordanians use phone)
Real-time	Supabase Realtime channels
State	Zustand
Offline	WatermelonDB or MMKV for local cache + sync queue
Push	Expo Notifications + Supabase Edge Functions

Typography

- **Cairo Bold** — all headings, player names, scores
- **Tajawal Regular** — body text, descriptions, labels
- **IBM Plex Mono** — score numbers ONLY (monospaced for alignment)

Spacing & Sizing

- Base unit: 8px
- Minimum tap target: 56px height, 48px width
- Bottom safe zone padding: 34px (iPhone home bar)
- Screen horizontal padding: 16px

Motion & Haptics

- Score update: spring animation (stiffness 200, damping 15) — bounces in
- Win celebration: confetti burst (gold + red particles) + heavy haptic
- Trick taken: scale 0.95 → 1.05 → 1.0 + light haptic

- Screen transitions: slide from right (RTL-aware, 280ms ease-out)
- Bottom sheet: spring slide up
- Button press: scale(0.96) 80ms
- Number change: count-up animation (not instant swap)
- Disputed score: red flash + medium haptic

Component Rules

- Cards: border-radius 16px, border 1px rgba(255,255,255,0.07), no shadows (use elevation via color)
- Buttons primary: full-width, 56px height, border-radius 14px, Cairo Bold
- Bottom navigation: 5 tabs, 60px height, Arabic labels only
- ALL layouts: direction RTL, text-align right
- Score grid: always 2x2 or 1x4, IBM Plex Mono, large (32–48px)

GAMES LIST (كل الألعاب)

Each game card shows: name, player count badge, difficulty dots, score system tag.

GAME SCORING RULES (100 دقيقة — حساب النقاط — قواعد حساب النقاط)

طرنيب عادي (Tarneeb)

- 4 players, 2 teams, 52 cards, 13 cards each
- Bidding team picks trump suit
- If bid met: +tricks taken to score
- If bid failed: -(bid amount), opponent +their tricks
- (0-13) without bidding: +16 | with bid: +26 | failed bid 13: -16
- Game ends at: 31 / 41 / 61 (CUSTOMIZABLE per session)

طرنيب سوري ٤١

- Same as طرنيب عادي BUT:
- Trump = OPPOSITE color of last dealt card (red last card → black trump)
- Game ends at 41 (default), customizable

٤٠٠ (أربعمية)

- 4 players, each bids individually (not teams)
- Points per successful bid based on bid amount
- Special rules when player approaches 30–39 pts (min bid increases)
- Target: reach 41 points first
- Customizable target: 41 / 51

تركس (كل الأنواع)

Structure: 4 players each has a "مملكة" (kingdom) = 5 contracts in any order they choose. Owner decides the order of their 5 contracts.

Contract scoring:

النقاط	العقد

لطوش	-15 per trick taken
ديناري	-10 per diamond card taken
بنات	-25 per queen taken
شيخ الكبة	-75 if you take king of spades
تركس	+200 first, +150 second, +100 third, +50 fourth

تدليل (Doubling): Player reveals dangerous card → penalty doubles. Revealer gets +original value bonus.

تركس شراكة: Same rules, partners (across players) combine scores.

تركس كومبلكس: Each مملكة has only 2 contracts: كومبلكس. كومبلكس + تركس = all other contracts combined into one round.

هاند / كنكان (Hand/Concan)

- 2-6 players, 2 decks + 2 jokers (106 cards)
- Goal: first to empty hand by forming sets (3-4 same rank) or sequences (3+ same suit)
- Minimum to start laying down: 51 points worth of cards
- Winner: -30 pts (or -60 for "هاند" — entire hand laid at once)
- Losers who laid cards: +value of remaining cards (Ace=11, Joker=15, pictures=10)
- Losers who laid NOTHING: +100 penalty
- If هاند: all penalties double
- Player eliminated at 101+ points

بلوت (Baloot)

- 4 players, 2 teams, 32 cards (7 to Ace)
- Bidding: "سن" or "حكم"
- Points per round from cards won
- Bonus for declared sequences (سلسلة) and sets
- Last trick: +10 bonus

- Game ends at 152 points or "قهوة" (landslide win)

بصرة (Basra)

- 2 players (or 4 in teams)
- Deal: 6 cards each + 4 face-up on table. Redeal 6 when empty.
- Jack captures ALL table cards
- بصرة: clear table WITHOUT Jack = +10 bonus per بصرة
- Scoring per round:
 - 27+ cards: +30 | Each Ace: +1 | Each Jack: +1
 - 2 of Clubs: +2 | 10 of Diamonds: +3 | Each 10+: بصرة
- Game ends at 121 (or 101, customizable)

ليخة (Leekha — Hearts variant)

- 4 players, LOWEST score wins
- Avoid: Queen of Spades (بنت سباتي) = +10 | 13 of Diamonds = +10 | Each heart = +1
- "Shoot the Moon": take ALL hearts + Queen of Spades → you get 0, others +26
- Game ends when any player hits 101+ → lowest score wins

دومينو (Domino)

- 2 or 4 players (teams of 2)
- 28 tiles (0-0 to 6-6), 7 tiles each, rest in draw pile
- Start: double-6. Match ends to extend chain.
- Round ends: player empties tiles OR table blocked ("انسدت الطاولة")
- Winner gets sum of all remaining tiles in opponents' hands
- Game ends at 100 or 200 (customizable)

جاكارو (Jackaroo)

- 4 players, 2 teams (partners across)
- Physical board — app tracks wins/losses + shows card cheat sheet

- Card reference (shown in-app):
 - Ace: exit Home OR 1/11 steps | King: exit Home
 - Queen: 12 steps | Jack: swap with opponent marble
 - 7: split between 2 marbles | 4: move backwards
 - Others: face value steps forward
- Win condition: all 8 team marbles in Safe Zone
- كومبلكس variant: adds killing rules (toggle in session settings)

APP SCREENS — DETAILED

SCREEN 1: Splash + Onboarding

- Logo animation: playing card flips to reveal "تعليقة شدة" in Cairo Bold
- 3 swipeable slides (skippable):
 1. "جلستك، قوانينك" — Your session, your rules
 2. "لا غش، لا خلافات" — No cheating, no disputes
 3. "سجل تاريخك مع الشلة" — Your history with the crew
- Phone OTP screen: large input, Arabic placeholder "رقم جوالك" 📱

SCREEN 2: Home

طرنيب • أمس • فزت	🏆
تركس • الجمعة • خسرت	
إحصائياتك هالشهر	
٦٠٪ فوز ١٢ جلسة	🏆

SCREEN 3: Create Session (Step-by-step, single scrollable screen)

Step 1 — اختيار اللعبة

- Horizontal scroll of game cards (2 rows)
- Each card: game name (large) + player count badge + difficulty dots
- Selected card: gold border + checkmark

Step 2 — إعدادات الجلسة

- Session name (optional): placeholder "جلسة القهوة" ☕
- Target score toggle: 31 / 41 / 61 (for طرنيب) — different cafés, different rules
- Game variant sub-option (appears only when relevant):
 - طرنيب: عادي / سوري ٤١
 - تركس: فردي / شراكة / كومبلكس
 - جاكاردو: عادي / كومبلكس
- Rounds alternative: toggle "عدد جولات" instead of score target
- Anti-cheat toggle: "كل لاعب يؤكد النتيجة" 🛡️
- Anti-cheat timeout (shown only when anti-cheat ON): 10 بدون / يدوي / 30 ثانية / ١٠ دقائق (مؤقت)
- Debt tracker toggle: "حاسبة الديون" 💰

Step 3 — ادعو اللاعبين

- Session code: huge, bold, centered (e.g. **SH-4829**)
- WhatsApp share button (pre-filled: "انضم لجلسة تعليلة شدة، الكود: SH-4829")
- Live list of joined players (real-time, names appear as they join)

- "ابدأ اللعبة" button — activates when minimum players joined, gold color

SCREEN 4: Active Session 🌟 MOST IMPORTANT SCREEN

This screen must work perfectly with one thumb, glanceable in 1 second between tricks.

Full Layout:

"سجل لطشة" Bottom Sheet (slides up on tap):

- Sheet height: 60% of screen
- Header: "مين أخذ اللطشة؟" in Cairo Bold 22px
- Player buttons: 2x2 grid, each 80px tall, player name + current score

- Tapping a player = records trick for them instantly
- Spring animation on score update
- If anti-cheat ON: sheet stays open showing "مستنيين تأكيد" with countdown

For تركس — Bottom Sheet shows contracts first:

:اختار العقد

[تركس +200] [شيخ الكبة -75] [بنات -25] [ديناري -10] [لطوش -15]

مين أخذ؟ → then ←

Score History Drawer:

- Swipe up from bottom of scoreboard to reveal
- Timeline of all rounds: "...جولة ١: سهل +٣، محمد -١"
- Tap any round to see details
- "تراجع" button on last round only

Undo System:

- Last action can be undone within 30 seconds
- "↶ تراجع" button visible for 30s after each entry
- After 30s: grayed out (permanent)

Voice Input: REMOVED Reason: Jordanian cafés are high-noise environments (nargileh, crowds, music). Arabic dialect speech recognition in noisy environments is unreliable and would frustrate users. All input is tap-only.

Keep Awake (منع قفل الشاشة) — CRITICAL:

- Activate expo-keep-awake (or equivalent) immediately when Active Session screen mounts
- Deactivate when user leaves Active Session screen (end session, background, navigate away)
- This is mandatory — players may not touch their phone for several minutes during actual play
- Show subtle "الشاشة نشطة ☀️" indicator in header corner so user knows it's working

Sound Effects (toggleable, default OFF):

- Trick taken: short card slap sound
 - كبوت: crowd roar + "كبوووت يا حيوان" voice clip
 - Win: celebration sound
 - Disputed: buzzer sound
-

SCREEN 5: End of Session 🎉

- Full-screen confetti (gold + red, 3 seconds)
 - Heavy haptic pulse
 - Winner card: crown icon + "بطل الجلسة" + player name
 - Stats breakdown:
 - لطشة X — [name]: ملك اللطش
 - [name]: أكثر واحد خسر 😅
 - دقيقة X: الجولة الأطول
 - Debt summary (if enabled): "محمد لازم يدفع ٣ دنانير لسهل" 💵
 - Buttons: "جلسة جديدة" 🎲 | "ارجع للبيت"
 - Auto-save to history (works offline too)
-

SCREEN 6: Profile + Stats

My Numbers:

- Win rate gauge (circular, gold fill)
- Favorite game (most played)
- Best streak (consecutive wins with fire emoji)
- Total sessions | Total لطشات | Total wins

Rank System:

🏆	10-0	مبتدئ sessions
🥈	30-11	لاعب sessions
🥇	60-31	محترف sessions

Titles (auto-earned, shown on profile):

👑 ملك اللطش	— most tricks all-time
🔥 الثنائي المرعب	— best duo win rate (with specific partner)
🐐 الـ GOAT	— highest win rate this month
😭 ملك الخسارة	— most losses this month
💀 5 —	يا وحش wins in a row
🔄 خسران بس بشرف	— lost most but always comes back
🎯 دقيق	— always meets bid exactly (طرنيب)
👊 بتشك فيه	— disputed score 3+ times

Achievements (Badges):

- "أول جلسة" — played first session
- "10 — ١٠ جلسات" sessions played
- "كبوت" — won by كبوت
- "2 بصرة مزدوجة" — 2 بصرات in one game
- "10 — sessions with anti-cheat enabled" بدون غش
- "الشلة الوفية" — played with same 3 people 10+ times

SCREEN 7: الشلة (Crew)

- List of everyone you've played with
- Per person: W/L record, favorite game together, last played
- "سهل فاز عليك ١٢ مرة وخسر ٤ — تأر منه" 😞
- Monthly mini-leaderboard within your crew
- "تحدّاه" button → opens new session invite

SCREEN 8: History

- All past sessions, newest first
- Filter: by game / by player / by date

- Each row: game name + players + winner + date + duration
 - Tap → full round-by-round replay
 - Search bar (by player name)
-

OFFLINE MODE (مهم جداً)

- All score recording works 100% offline
 - Local DB (MMKV or WatermelonDB) stores every event
 - Sync queue: when internet returns, syncs automatically in background
 - "غير متصل"  indicator in header when offline
 - "تمت المزامنة"  toast when sync completes
 - Conflict resolution: last-write-wins per round (timestamp-based)
 - Anti-cheat: disabled automatically when offline (needs all players connected)
-

ANTI-CHEAT SYSTEM (محسن)

When enabled:

1. Recorder taps player who took trick
2. Bottom sheet shows: "تأكيد اللطشة — ثواني [X]" with countdown bar
3. All OTHER players get push notification instantly
4. Players tap  (صح) or  (غلط) from notification or app
5. **Fast path:** Majority confirms → auto-records + green flash
6. **Dispute path:** Any player taps  → red flash + message
7. **Timeout path:** Timer expires → auto-confirms (majority wins)

Timeout options (set in session settings before starting):

- ١٠ ثواني — default, fast-paced sessions
- ٣٠ ثانية — relaxed sessions, players not always watching phone

- يدوي — no timer, each player must manually confirm, session host can force-confirm after 60s

Dispute messages (random):

- " في خلاف! ناقشوا مع بعض " 😂
 - " مين اللي بيغش هون؟ " 🙄
 - "[name] بتشك فيك والله يا "
 - " يا زلّة اتفقوا " 😞
 - " حگّموا الكبير بينكم "
 - " هاد الكلام ما بنتهي " 😂
-

LEVANTINE UI COPY — COMPLETE

All phrases rotate randomly. Use Cairo Bold for impact words.

- "يا كبوت يا بلاش تلعب"
- "الله يعين الخاسرين" 😂

Empty states:

- "لسا ما لعبتوا — يلا افتحوا جلسة"
 - "ما في جلسات هالشهر؟ وين رحتوا؟" 😂
 - "الشلة ما اجتمعت — وين كل واحد؟"
-

DEBT TRACKER (حاسبة الديون)

When enabled in session settings:

- Before session: set stakes per point (e.g. 0.10 JOD per point difference)
 - OR fixed amount per game (e.g. 1 JOD per lost game)
 - End of session: auto-calculate who owes whom
 - Display: "محمد يدفع ٣.٥٠ دينار لسهل" 🏠
 - Settlement: tap "تم الدفع" ✅ to clear debt
 - History: all debts tracked per person
 - Running balance: "محمد عليه ١٢ دينار من آخر شهر" 😂
-

MONETIZATION

Free Tier (الكل يستخدمه)

- Up to 3 active crews
- Last 20 sessions history
- Basic stats (win rate, total sessions)

CRITICAL RULES FOR AI BUILDER

1. **RTL FIRST:** Every layout RTL. Every text right-aligned. Test all screens mirrored.
2. **MOBILE ONLY:** No responsive desktop. One-thumb use. All primary actions bottom 60% of screen.
3. **REAL-TIME IS CORE:** Active session screen must update for all players in <500ms.
4. **GAME LOGIC IS EXACT:** Scoring rules must match specifications above perfectly. Zero approximation.
5. **LEVANTINE COPY:** Never فصحى. Never English in UI. Jordanian dialect only as specified.
6. **OFFLINE FIRST:** Score recording must work with zero connectivity. Sync later.
7. **DARK ONLY:** #0D0D1A background. No light mode toggle in MVP.
8. **UNDO IS SACRED:** Always allow undoing the last entry within 30 seconds.
9. **NEVER block the active session screen** with ads, prompts, or pop-ups.
10. **Sound + haptics are opt-in**, never forced. Default: haptics ON, sounds OFF.
11. **KEEP AWAKE IS MANDATORY:** Use `expo-keep-awake` on Active Session screen. Players don't touch phone for minutes during play. Screen must never auto-lock during an active session.
12. **NO VOICE INPUT:** Removed permanently. Jordanian cafés are too noisy for reliable Arabic dialect speech recognition. All input is tap-only.
